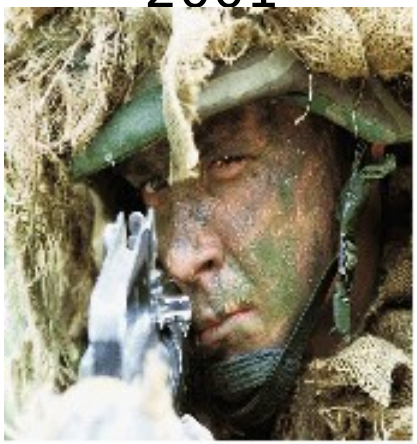
NEW TO ITAM – ITAM Newsletter

Issue 15
Summer
2001



THE BRIDGE

The Bridge is the ITAM Program's Newsletter

- Provides information and insight on the ITAM Program including natural resources issues
- 3 Issues published per year
- Issue responsibility is by team
- Installations can submit articles outside their "issue" -- timeliness is key
- Distribution IAW MACOM mailing list
- Newsletter is posted to ITAM Web Page

NEW TO ITAM – ITAM Newsletter

The Bridge Issue 15 Summer 2001
41st ARMED FORCES APPRECIATION WEEKEND
By Jay Becker, Fort Irwin, CA
Torrence, CA—From 18 through 20 June the ITAM team from Fort Irwin, CA took the opportunity to reach out to civilians and armed forces personnel and enlighten them about the Army's commitment to environmental stewardship. Held near Los Angeles, the annual Armed Forces Appreciation Weekend gives people from all walks of life a chance to get to know our nation's military up close and personal. Whether exploring the interior of a Sheridan tank, going for a ride in an Air Force flight simulator, or learning about the Army's on-going efforts to conserve and sustain training areas in the Mojave Desert, the three day event offered much for everyone.
Crowds of all ages descended upon the Del Amo Shopping Mall (the largest mall in the West) to pay their respects to America's fighting forces.
Four separate booths were set up end-to-end in the long three-sided tent. The first booth featured NTC operations related to air quality monitoring. The next was an elaborate wildlife display featuring many reptile, bird, and insect species of the Mojave, including four six-month old desert tortoises. They were a big hit and many people wondered if they might be animatronics; it is difficult to escape the Disney mentality in Southern California. The cultural resources department presented an interesting array of artifacts and rock art petroglyphs common to the region of the NTC.
(Continued on page 2)

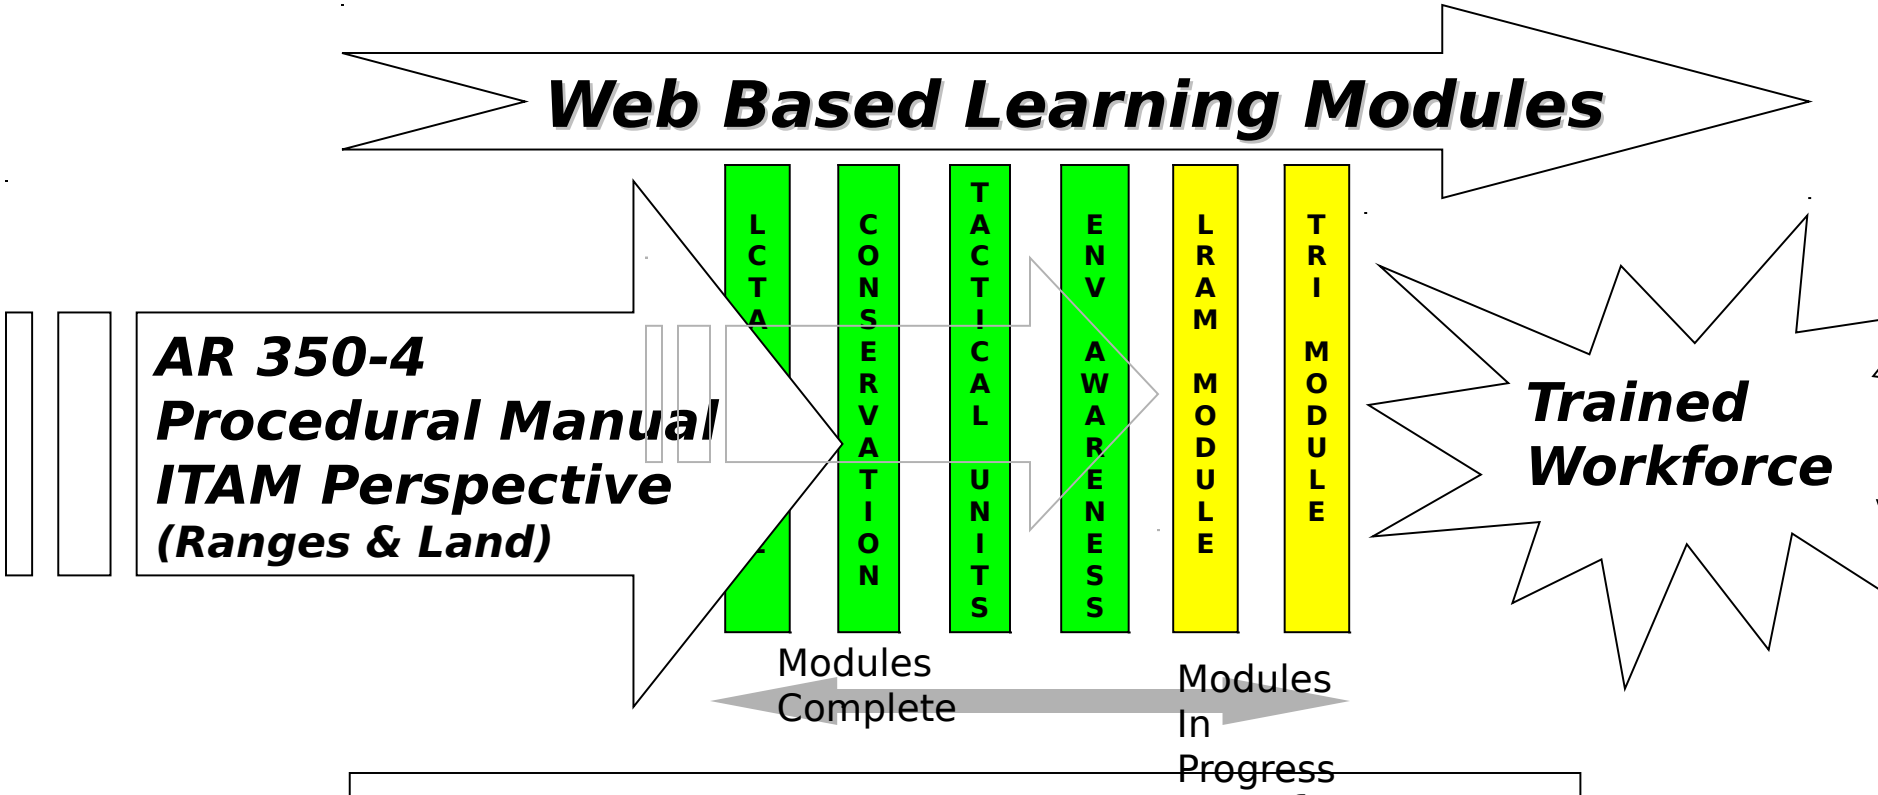
NEW TO ITAM – Management Course Modules



Incorporates Core Components of ITAM
Plus: military mission and conservation practices

NEW TO ITAM – Management Course Modules

ITAM Learning Module
Environmental Awareness (EA)

By completing this Learning Module, students will learn to:

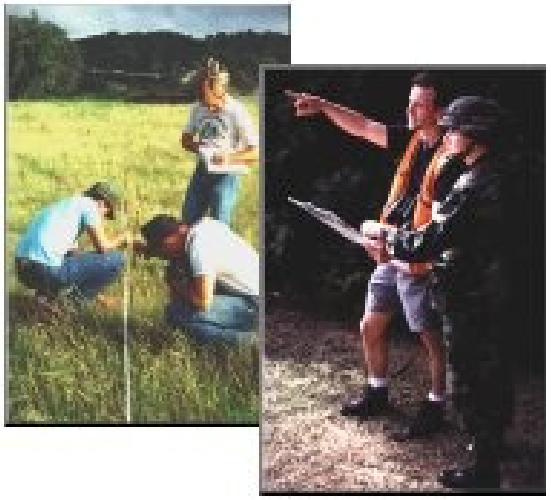
- Identify learning materials that support the ITAM Environmental Awareness Program Objectives
- Develop and procure ITAM Environmental Awareness materials

NEW TO ITAM – Management Course Modules

ITAM Learning Module
Land Condition Trend Analysis

By completing this Learning Module, students will:

1. Understand the basic structure and components of representative LCTA databases.
2. Be able to summarize, analyze and apply LCTA data to answer specific land management and training management questions related to:
   - Natural Resources Characterization
   - Natural Resources Condition and Trends
   - Military Land Use/Impacts
   - Environmental Constraints to Military Land Use
   - Tactical/Terrain Analysis



NEW TO ITAM – Management Course Modules

ITAM Learning Module
Tactical Units and Equipment

- Unit Organization
  -- Branches of the Army and related Battlefield Operating Systems.
- Combat Equipment and Vehicles
- The Army Division
  -- Tactical echelons -- Squad to Army
- Staff Organizations
  -- Battalion command & control

NEW TO ITAM – Management Course Modules

ITAM Learning Module
Army Conservation Organizations, Planning & Functions

- Conservation Foundations
  -- History, Environmental Laws & Strategy

- Conservation Organizations & Staffs

- Conservation Program Areas & Regulations

- Integrated Natural Resources & Cultural Resources Management

NEW TO ITAM

AGENDA

- **WELCOME**
  - **Larry Chenkin**
- **ATSC TEAM**
  - **Larry Chenkin**
- **AEC TEAM**
  - **Kim Michaels**
- **WORK PLAN ANALYSIS MODULE**
  - **Larry Jantz**
- **INSTALLATION PERSPECTIVE**
  - **Billy Karnes, Ken Zitz, Gary Larsen**

Workplan Analysis Module Training

- **What is WAM?**
- **WAM consists of:**
  - **Installation Workplan Analysis Program**
  - **MACOM Workplan Analysis Program**
  - **HQ DA Workplan Analysis Program**
- **WAM is a computer-based software program that:**
  - **Develops ITAM projects and costs**
  - **Transmits the annual work plan and its projects through the required review and validation process**
  - **Updates work projects throughout the fiscal year**

Workplan Analysis Module Training

- **WAM uses proven and supportable software (MS Access 97- Access 2000 compatible)**
- **WAM is used by ITAM managers at the Installation, MACOM, and HQDA**
- **Knowledge of MS Access is not required to use WAM**
- **WAM uses point and click technology**
- **WAM reduces redundant data entry through use of drop-down boxes**
- **WAM builds and tracks ITAM projects from initial entry, to submission, to completion**
- **WAM provides standard project and work plan reports**
- **WAM sorts projects by Fiscal Year, Installation, ITAM component, and status**
- **WAM exports to MS Excel for report customization**

Workplan Analysis Module Training

- **Core WAM training will be provided in room 213 during the period of 1300-1500 Tuesday and Wednesday, and 0800-1000 on Thursday**
- **Primary objectives of WAM training will be**
  - **IWAM Introduction**
  - **ITAM Workplan history**
    - **(Excel - Beta - IWAM99 – IWAM2000…)**
  - **IWAM Capabilities**
  - **IWAM Support**
- **The following specific operational problems experienced by installations and programmatic changes to the WAM will also be discussed followed by a question and answer period**

Workplan Analysis Module Training

Want to print project slides with all aspects, not just title	**Functionality exists** **Training Issue**
No “cut and past” capability to carry over unfunded projects to the following year	**Functionality exists** **Training Issue**
Want to change sub-categories only, don’t want to reenter same information over and over.	**Major Program Change. Burden reduced by copy migrate function.** **Training Issue**
Want to print more than one project at a time	**Functionality exists** **Training Issue**

Workplan Analysis Module Training

Copy of validated projects to next year (UFER), changes the status from "V" to "P", although you can keep the prior year project number, causes (funded) project to be re-approved, wasting resources.	**Functionality exists. Migrate retains "V" status.** **Training Issue**
Want to edit/mod "P" project ID numbers.	**Functionality exists ONLY BEFORE WPS EXPORTED.** **Training Issue**
Want to be able to do multiple deletes or adds, at one time.	**Major Program Change. Functionality exists singularly .**

Workplan Analysis Module Training

Want the ability to enter the projects and then to prioritize and list them by priority. This program does not give us the ability to CUT and PASTE in the sequencing.	**WAM does sort by priority. WAM also has "copy" functionality, where you can customize project priority** **Training Issue**
Want to be able to print out a full set of project slides with all work/sub categories included. Currently, printouts are limited to just project headings.	**Functionality exists - Print out the project detail report** **Training Issue**

Workplan Analysis Module Training

Unable to scroll entire listing on the View Details. Scroll box has limits.	**CALIBRE will review - no apparent limits** **Training Issue**
Want the background gray shading eliminated from slides. Makes files to large to print.	**CALIBRE will review - no apparent shading** **Training Issue**
9th project in WPS view does not show up on monitor, need down arrow to shift view.	**CALIBRE will review scroll bar currently available** **Training Issue**

Workplan Analysis Module Training

Want the ability to make pie charts and manipulate them.	**Functionality exists to export to excel** **Training Issue**
Want to get the reconciliation boxes expanded so that we can add multiple line items. For example, an LRAM project may have both a gravel purchase, equipment lease, seeding contract, and a Class IV purchase. Would be nice to be able to add each line into the program as the purchases are made. This also means that we are going to have to be able to modify the columns on a regular basis.	**Functionality exists to enter multiple line items during initial entry, enter purchase costs later** **Training Issue**

Workplan Analysis Module Training

Add MWAM report "MACOM Non-Validated Installation Requirements Summary"	**Proceed using Government template**
Add MWAM report " MACOM Validated/Adjusted Values vs. Installation Requirements Summary"	**Proceed using Government template**
Add MWAM report "MACOM SUMMARY; Installation Requirements by Component"	**Proceed using Government template**

Workplan Analysis Module Training

<u>Priority One</u>: ATSC to decide if the Government wants a Platform independent software OR continue with Access based software (Independent Government Activity wood not recommend another OS over Micro Soft considering the technical aspects of the ITAM program)	**Proceed w/Access-based software**
<u>Priority two</u>:All MACOM reviewed values in Table 7 (not table 6) and converting installation data **Will require data call from Field (= recreating ALL _be.mdb files; possible disconnect if entered data AFTER validated from MACOM)**	

Workplan Analysis Module Training

Priority 3: Show validated values & requirements (be able to distinguish between the two when selected)on the WPS screen	Proceeding. This is an asthetic change and can be accomplished once Priority #2 is completed
Priority 4: Make the Training Facility Checklist more intuitive (instead of 2 boxes)	Proceeding
Priority 5: WAM installs properly, but appears to not shut down properly.	Test on Windows 2000

Workplan Analysis Module Training

Priority 6: Local Project ID# needs to be sequenced in reports.	**Proceeding**
Priority 7: Create a caution message: " Are you sure you want to export this file? You will not be able to edit this file once you do this!"	**Proceeding. Expand message already included in text of Export Screen.**
Priority 8: Include WAM timeline as appendix	**Proceeding.**
